INFINITY FEATURES

INFINITY SPAS

WHY INFINITY SPAS?

Infinity has been a leading spa brand in Europe for over 20 years.

The Infinity range is designed for the discerning owner demanding exceptionally high quality and longevity alongside top class performance.

The current models are the most reliable and best engineered that Infinity has ever made, ensuring your investment will last for years and years.

GREAT SERVICE

Your Riptide service team can help with any issues with your Infinity spa after installation and they will aim to get you back into hot water as quickly as possible!

INFINITE LUXURY

THE NEW INFINITY RANGE

provides unrivalled levels of luxury and sublime relaxation.

Each seat is contoured to surround your body with a soothing massage and is optimised for your comfort. An Infinity spa can be a quiet place to relax and reflect, or an unforgettable wellness experience enjoyed with your partner, friends or family. However, you use our spa you can be sure of a superb massage that will relieve tired muscles and help bring peace of mind.

SPARKLING CLEAN SPA WATER

with optional low-cost auto sanitizing system.

At the heart of each Infinity spa is a state-of-the-art water cleaning system designed to keep your spa water quality totally safe and sparkling clean. Every drop of water is filtered over and over to remove all impurities. The bathing water is then passed through an ozone system which kills bacteria, then onwards to a silver ioniser which acts to inhibit bacteria growth.

For added protection an automatic sanitizing system can also be fitted which is both low cost to install and easy to replenish with sanitizer.

ENVIRONMENTALLY FRIENDLY

Energy is precious and shouldn't be wasted. The manufacture of Infinity spas produces almost no waste. The sheet acrylic used to form the spa shell requires less than 1% of trimming. The wood frame comes from a

renewable source. The beautifully crafted cabinet is constructed of ABS which adds an extra layer of heat and sound insulation, whilst also very durable and easy to clean.

Additionally, Infinity spas have high performance insulation to retain heat in the spa water, further reducing energy consumption and running costs.

SPECIAL FEATURES

- Perfectly Matched Jet Formations
- 99% Efficient Ozone System
- Hidden Filter Design
- Noise Reduction Technology
- Ergonomic Lounger & Seat Design
- Ultra Energy Efficient

Power saver INSULATION SYSTEM and efficient engineering

The Ultimate in Insulation

There are many methods of spa insulation, but the ultimate aim is to retain the heat in the spa water and to keep the re-heating costs to a minimum. The Power saver insulation system on Riptide Spas is designed to deliver instant access to your lovely warm spa water all year round, but use a minimum amount of electricity to maintain it.

To achieve optimum insulation, high density foam is spray-applied on the spa shell, plus insulation on the inside of the “no gap” cabinet, two parts are fixed together to make a snug fit, eliminating any gaps.

Efficient Engineering

The pumps and heater produce heat as a by-product of their operation. Infinity Spas retain this heat inside the cabinet space aiding heat retention in the spa water.

Marine Grade Vinyl Encasement
Thick Polystyrene Core
Shrink Wrap Aluminium Foil

Heat and Moisture-Proof Cover

The spa cover is an important barrier against heat loss. Riptide's fully tailored marine grade vinyl covers have extra insulation to maintain water temperature. The core is made of 100mm polystyrene which in turn is covered in heat reflecting, shrink wrap aluminium foil. This foil layer also keeps water out of the polystyrene, helping to protect the core from getting heavy through damage by ozone and chlorine which are ever present in your spa water.

Child proof locking straps, built in handles, fitted wind skirt and additional hinge insulation (a traditionally weak spot in many spa cover designs) all come as standard.

The Variable Jet System

The stainless steel hydrotherapy jets you'll find in Infinity spas are easy to replace and are interchangeable (of the same size). Performing various actions, adjust each nozzle individually for a great targeted massage.

- Foot Massage Jet (direct action)
- Stimulation Jet (direct action)
- Neck Massage Jet (direct action)
- Single Pulse Jet (rotating action)
- Twin Pulse Jet (rotating action)

THE INFINITY RANGE

INFINITY 160

SPA ZONE CONTROL

The Spa Zone jet control system allows you to adjust which areas are getting full power, half power or no jet power. Every single jet is either individually turned on or off or there is a bar top control for clusters of jets.

This means everybody gets to enjoy the spa experience that suits them, with their preferred amount of jets and water pressure.

Spa Zone pumps distribution

Lighting	Underwater and water edge lighting

INFINITY 160

Compact with a Sublime Jet Massage

The baby Infinity 160 is designed to fit in those smaller spaces. It is ideal for couples of all ages with the added benefit of a third seat.

When seating two people, both can stretch out and enjoy side by side loungers, giving an enjoyable impression of weightlessness. In this modestly sized space there is still space for 34 jets, so no part of the body will miss out on terrific massage therapy; neck, back, calves and feet are all in for a treat!

Also features three soft pillows, easy access filter house, handy bar top controls and over size underwater light.

INFINITY 360

A well thought out design, promising many unforgettable experiences

The all new Infinity 360 is a cleverly designed 5-person hot tub with a modest footprint of only 200cm square and 82cm deep which is extremely comfortable and yet compact.

Each seat is ergonomically designed for optimum comfort, and with 36 well placed jets everyone is going to find their favourite seat. There is a non-slip floor, dedicated entry steps, neck pillows, easy access filtration, simple to operate bar top controls, and bright underwater LED lighting.

INFINITY 560

A Fantastic Mid-sized Spa

The amazing new Infinity 560 is a cleverly designed five person hot tub with a medium size footprint. At only 212 x 212 and 92 cm deep it is a comfortable and yet compact mid-size spa.

With each seat ergonomically designed for optimum comfort and with 43 well placed jets there will be seat to suit everyone. There is a non-slip floor, dedicated entry steps, easily accessible filtration and easy to use bar top controls.

INFINITY 760

Gentle but Energizing

Gentle on the back and neck and energizing to the muscles, the awesome new Infinity 760 is a roomy five person hot tub with a footprint of 230 x 230 and 920 deep. It is amazingly spacious and comfortable giving everyone room to spread out, and each seat is ergonomically designed for optimum comfort.

Featuring 45 well placed jets, there is a non-slip floor, dedicated entry steps, neck pillows, easy access filtration. handy to use bar top controls. At night the Infinity 760 comes into its own, water edge and underwater lighting really bring the spa to life.

Classic Features

INFINITY 760T

The Highest Level of Comfort

Sister to the 760, the Infinity 760T is a spacious five person hot tub with a large footprint and is amazingly comfortable, giving everyone room to spread out.

Ergonomically designed for optimum comfort with 58 well place jets and powerful three pump system, this is a significantly powerful spa.

Loaded with all the fantastic features of the Infinity range, at night the 760T's water edge and underwater LED lighting creates a magical, watery world. Even a large spa like the 760T uses very little power due to its high density foam insulation and extra thick thermal cover, making ownership a joy.

INFINITY 770

A Haven of Peace and Tranquility

Experiencing the Infinity 770 is more like flying business class than relaxing in a hot tub. Extremely comfortable and with an abundance of invigorating massage jets, it is indeed in a class of its own.

At 2.3m square the 770 is very roomy five person hot tub which has a unique layout offering a wonderfully comfortable space for everyone to spread out. There are two full length loungers, two captain's chairs, a jump seat plus a handy cool down step.

Let the 57 jets pamper you with a foot, neck, back and leg massage. Rest your head on one of the comfortable neck pillows while the adjustable jets relax, tight tired muscles. High density foam insulation and fully insulated cover retains the heat within the spa, meaning you can take a dip anytime, all year round.

Classic Features

INFINITY 830

The Highest Level of Comfort

The Infinity 830 is an extra large spa with an open style 'hot tub' design. With 3 hydrotherapy seats, 2 neck and shoulder therapy seat and plenty of bench seating the Islander is perfect for hydro-massage, relaxation and entertaining with family and friends.

At night the Infinity 830 comes into its own, water edge and underwater lighting really bring the spa to life. The 830 uses very little power due to its high-density foam insulation and extra thick thermal cover, making spa ownership inexpensive and ready to use anytime.

PLATINUM FEATURES

Ease of use, beautifully engineered

In addition to the Classic features, the Infinity Platinum Spas also introduces some addition benefits including superior technology, easier maintenance, lower running costs and more fun for a better spa experience.

GECKO IN.K1001 KEYPAD

Infinity spas incorporate the fully featured GECKO IN.K1000 keypad with touch activated colour screen display

Fun, simple, engaging

Doing away with physical buttons, keys and overlays, the Canadian manufactured in.k1000+ touch screen keypad is fun to use and simple to learn. It features an intuitive and engaging one level menu interface.

Truly interactive

Mode and function selection wheels, all-on/all-off one touch activation key, interactive display icons and on-screen reminders make for a unique user interface. Get direct feedback and seamless interaction with your Infinity spa.

Larger, faster, cooler

Driven by a powerful 400 MHz processor, Gecko's in.k1000 keypad features an eye-catching 11cm colour LCD capacitive touch screen display. Resting in a thin and beautiful enclosure that houses its cutting-edge electronics, in.k1000+ works perfectly on the edge of your Infinity spa, controlling heat, jets, pumps, filtration and more.

DOUBLE FOUNTAIN

The sound of gently splashing water can be especially calming and when combined with light flowing through the controllable fountain in two gentle arcs, will help your mood melt into peace and tranquility.

HAND HELD MASSAGER

Available as an optional extra, you can use the hand held jet massager to target specific areas of the body to soothe away aches and pains.

Fits quickly and easily into the jet opening at the base of Infinity spas.

PLATINUM DREAMTIME LIGHTING

When the sun goes down it's time for the light show to begin. Your platinum Infinity spa has 6 different LED lighting points: a large underwater light, water edge lighting all around the spa, beneath the waterfall, the bar top controls, an exterior courtesy light and corner LED lighting. Choose your favourite colour or set the lights to rotate through all the colours and let the illumination cascade through the spectrum at a pace to suit your mood.

PLATINUM POWER SAVER INSULATION SYSTEM

Infinity platinum spas insulation system ensure minimal heat loss during running time and provides the most efficient running costs:

- Lockable cover with high density insulating foam stops heat loss from above.
- 25mm thick foam on the shell stops heat loss through the spa shell.
- "No Gap" cabinet keeps heat in and cold air out.
- Insulated cladding plus 2 layers of insulation stops heat loss from the cabinet
- ABS base plus one layer of insulation stops heat loss into the ground

MORE THAN A HOT TUB

The benefits to your health and well-being

Promotes weight loss

In clinical studies patients who use hot tubs lost an average of 3.5 pounds in weight without any new diet or physical exercise programmes.

In short, the weight loss resulted from the hot water massage simulating the effects of exercise, on the muscles.

Stress relief

Stress results in muscle tension, headaches, fatigue and soreness. Regular hot tub use, through a combination of buoyancy, heat and massage relieves tension and stress.

Buoyancy eases pressure in joints and muscles, while heat increases blood flow to muscles and accelerates healing. Additionally, hot tub jets provide therapeutic massage, stimulating the release of endorphins, which are the body's natural painkiller.

Lower diabetic blood sugar levels

A study by the New England Journal of Medicine found that bathing in a hot tub simulates the beneficial effects of exercise.

The result is that patients with type 2 diabetes who soak in a hot tub for 30 minutes a day, 6 days a week for 3 weeks, experience a reduction in blood sugar levels by an average of 13%.

Be together

Spend time together, immersed in warm water. The spa becomes a private and safe place where people can relax, let their guard down, and enjoy meaningful conversation and special moments with loved ones.

Be outside

Take a pause and appreciate beautiful sunsets, stary nights, falling snow, changing leaves and much more. With a hot tub, you have a private retreat steps away from your door. Surrounded by nature, you can take in the beauty we often take for granted.

Be yourself

Be at your best every day by making a spa a part of your daily ritual. Experience relief of stress and tension from sore muscles and emotional and mental benefits. Immersed in warm water, you can disconnect and emerge renewed.

Minimise the pain of arthritis

For people with arthritis, the Arthritis Research Campaign recommends using a hot tub as an excellent way to apply heat to arthritic joints.

Benefits of a soak in a hot tub can include muscle relaxation, decreased pain and joint stiffness and greater ease when performing exercise and daily activities.

Sleep more soundly

No more counting sheep! According to the National Sleep Foundation, 30 million Britons suffer from mild to chronic insomnia and other sleep disorders.

A study in the journal 'Sleep' showed that soaking in a hot tub prior to bedtime will not only help you fall asleep, but will provide a deeper, more relaxing sleep as the body cools.

Lowers blood pressure

A recent study for the Mayo Clinic recommended that relaxing in a hot tub can be beneficial for heart disease patients. The study showed that relaxing in a hot tub is less stressful on the heart and more beneficial than working out on an exercise bike! The study also demonstrated that soaking in the hot tub for as little as 15 minutes will lower blood pressure.
